Order of races

- 200 meters qualification by all riders of all categories.
- Classification in groups of 3 riders. Classification shall take place only on time. The categories format is released.
- 1st round sprints: the rider who wins the race promotes a pool. The last rider degrades a pool.
(with the exception of the first and the last pool, in the first pool cannot be promoted, in the last pool cannot be degraded) If the number of riders makes it necessary the organization has the right to make a fastest pool (pool 1) with 2 riders or the last pool with 4 riders.
- There will be three rounds. The results after 3 rounds will be fixed per category.
- By these results riders will be placed in a keirin pool of 6 riders. Riders 1-6 in the first pool, riders 7-12 in the second pool etc. etc. If necessary the number of riders of the first or last pool can be different.
- The first 2 riders of every keirin race promotes a pool, the last 2 riders each race degrades a pool. Number 3 and 4 keeps their places in that pool.
- There will be 2 keirin rounds. The final results per category will be published after the second race.

Classification

The results of the 200 meters qualification, the results of the sprintraces and the results of the keirin races are counting equally in the final results.
